

Certificate / License Manager

The Redkite Certificate / License Manager is designed to complement and enhance training records held in Redkite Tracker. It enables the production of high quality certificates / licenses to show that you recognise and reward the achievements of your staff or those you are training.

You can quickly produce custom certificates or licenses using the simple but effective design tools included with the Redkite Certificate / License Manager.

A sample certificate / license - all images and wording can be changed to suit your needs.

- ✓ Design a unique certificate / license for each award incorporating your corporate logo and imagery.
- ✓ Identify competence / units / training that needs to be achieved for a certificate / license to be awarded.
- ✓ Print certificates / licenses.
- ✓ Print competence or operational areas on the rear of the certificate or license.
- ✓ Record what certificates / licenses have been issued.
- ✓ Print duplicate certificates / licenses.
- ✓ Control the production of certificates / licenses.
- ✓ NEW Bar-code security feature.
- ✓ The Redkite Certificate / License can print a unique bar code on every certificate or license. Bar-codes can be scanned and will link to an on-line photograph of the owner for verification purposes.
